NITIN JAIN

Senior Service Delivery Manager | Cybersecurity, IAM/IGA & Application Operations | DevOps & Cloud

Gurgaon, India | +91 9460782895 | nitiniaj5@gmail.com

PROFESSIONAL SUMMARY

Service Delivery and technology leader with 11+ years of experience spanning cybersecurity operations, IAM/IGA, application development, DevOps transformation and cloud advisory. Currently serving as a Cybersecurity Service Delivery Manager, leading offshore delivery across IAM, PAM, IGA, infrastructure and network-security services. Experienced in SLA/KPI governance, incident and request operations, backlog control, risk and escalation management, workforce planning, stakeholder governance and continuou s improvement. Brings hands-on engineering grounding in Java, Python, REST services, CI/CD and AWS, enabling effective leadership across legacy and modern application environments. Actively advancing AI-enabled service management.

CORE LEADERSHIP & TECHNICAL CAPABILITIES

Service Delivery & AMS End-to-end operations | L1-L3/BAU support | enhancements | SLA/OLA/KPI governance | incident, request, problem and change management	**Client & Governance** Executive communication | WSR/MBR/QBR inputs | risk and escalation management | offshore-onshore coordination | service reviews
People & Commercial Operations Team leadership | resource allocation | capacity and staffing forecasts | RGS/WON governance | hiring and onboarding | vendor coordination	**Technology Leadership** Java | Python | REST APIs | DevOps | Jenkins | GitHub Actions | Docker | Kubernetes | AWS | GCP | Saviynt | BeyondTrust | ServiceNow
IAM / Security Saviynt IGA/EIC | JML | access governance | RBAC/ABAC | SoD | campaigns | AD/Entra ID | BeyondTrust Password Safe, PRA and EPM	**Operational Excellence** SLA breach prevention | ageing backlog reduction | RCA/problem management | change governance | service continuity | audit readiness
AI & Automation Saviynt Agentic AI and ISPM enablement | operational analytics | automated identity-risk insights | automation opportunity identification	**Methods** Agile | Scrum | DevOps | Waterfall | architecture and requirements review | continuous improvement

PROFESSIONAL EXPERIENCE

Service Delivery Manager - Cybersecurity (European Account) — Feb 2025 - Present

Tata Consultancy Services | Gurgaon / Global Delivery

Own offshore service delivery and BAU governance across a multi-tower security portfolio covering IAM/IGA, PAM, Active Directory, Entra ID, endpoint security, email security, PKI, network security, F5, Check Point, Palo Alto and Zscaler services.

Lead a delivery organization of approximately 25-30 professionals and coordinate tower leads, SMEs and support analysts across onshore-offshore teams; act as the offshore escalation point and service-management interface.

Govern incident and service-request performance through daily operational reviews, ageing analysis, SLA risk tracking, change controls and proactive closure actions; reported 78% first-level resolution against a 70% target and sustained zero incident/RITM breaches over a 69-day period in an operational update.

Publish daily and weekly service updates covering risks, escalations, open demand, incident/RITM backlog, ageing tickets, pla nned changes, hiring status and delivery highlights; support customer governance, CAB and leadership reviews.

Drive IAM and PAM delivery for Saviynt IGA and BT Password Safe, Privileged Remote Access and Endpoint Privilege Management, including resource planning, service continuity, escalation handling and skill development.

Coordinate Saviynt BAU and enhancement activities including UAT and production readiness, operational handbook development, j ob and connector monitoring, access requests, analytics, lifecycle workflows and troubleshooting support.

Manage resource allocation, replacement planning and capacity risk for critical skills; raise and track RGS/WON requirements, evaluate profiles, coordinate approvals and accelerate onboarding to protect client deliverables.

Partner with customer managers, delivery leadership, PMO, RMG and security SMEs to resolve service risks, manage expectations and maintain continuity during leadership absences and high-priority events.

Support growth and transformation opportunities through SOW inputs, resource estimates and delivery planning for PAM, Saviynt , GRC, PKI/HSM, F5 and security transformation initiatives.

Promote continuous learning through Saviynt enablement, certification planning and cross-skilling; explore Agentic AI and identity-security-posture use cases for risk prioritization, knowledge support and operational automation.

DevOps Consultant - AWS Unit - US Client — 2022 - 2025

Tata Consultancy Services

Assessed DevOps maturity and technology posture across a large enterprise application landscape, translating business and engineering requirements into modernization and migration recommendations.

Developed application-camp strategies, technology upgrade dispositions and continuous-improvement models across hundreds of applications.

Worked with application owners and engineering teams on CI/CD, source control, quality controls, cloud readiness and operatio nal-standard alignment.

Technical - DevOps Lead - (European Shipping client) 2020 - 2021

Tata Consultancy Services

Led DevOps delivery for the in-house DIGISHIP product, supporting solution design, delivery planning, CI/CD and client engagement.
Coordinated development and operations activities and managed product delivery for an eight-month engagement.

Java Lead, DevOps Engineer & SAP BO Developer – Ultimatix 2015 - 2021

Tata Consultancy Services

Progressed from Java developer to team lead, leading a five-member team supporting enterprise applications including iEvolve and GPS.
Developed RESTful services and contributed to application architecture, requirements analysis, technical design and production delivery.
Led DevOps transformation activities with the DevOps COE, migrating applications to Jenkins pipelines and source control from SVN to Git.
Contributed to migration of enterprise analytics reports from SAP BusinessObjects to Java-based solutions.

SELECTED SERVICE DELIVERY IMPACT

Service governance: established structured daily visibility across open incidents, requests, ageing backlog, change calendars, risks, staffing and customer escalations.
SLA management: tracked response and resolution of SLAs by priority, coordinated exception reviews with customer stakeholders and drove corrective actions for underperforming measures.
Workforce continuity: planned replacements for critical PAM/IGA and security roles, managed approvals and onboarding, and mitigated delivery risks created by attrition or skill shortages.
Identity operations: supported Saviynt JML, birthright provisioning, access requests, workflow/rule operations, analytics, campaigns, integrations and production support in a global manufacturing environment.
Client partnering served as a first point of contact during onshore leadership absence and maintained daily alignment across customer and delivery teams.
Engineering-to-operations bridge: combine Java/Python/DevOps experience with service-management leadership to challenge technical plans, guide RCA and align modernisation with operational outcomes.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

AWS Certified Solutions Architect - Associate
AWS Certified Solutions Architect – Professional
Scrum certification - Scrum Master
Saviynt L100, L200 Certification, AI Age
Silver level mentorship (Internal TCS)

TECHNICAL SKILLS

Programming: Java, Python, RESTful web services, SQL
DevOps & Cloud: Jenkins, GitHub Actions, Maven, SonarQube, Docker, Kubernetes, Git, SVN, AWS, GCP
IAM & Security: Saviynt EIC/IGA, JML, RBAC/ABAC, SoD, Campaigns, AD, MS Entra ID, BT PAM/PRA/EPM, ServiceNow
Engineering & Analytics: SAP BusinessObjects, HTML, CSS, JavaScript, Eclipse, WebLogic, Visual Studio
Delivery: IT service management, SLA/KPI governance, incident/request/problem/change management, Agile, Scrum, DevOps, stakeholder management

Training & Mentoring

- A passionate learner, mentor, and knowledge-sharing advocate, having trained 500+ associates in IAM and Cybersecurity and 100+ in DevOps and GitHub Actions. Committed to building technical capability, encouraging continuous learning, and enabling teams to apply knowledge effectively in real-world scenarios.

- Initiated and led an L1-to-L3 competency development program, partnering with technology vendors to provide specialized training across teams. The initiative strengthened internal capabilities, reduced dependency on external professionals for L2/L3 backfills and delivered estimated cost savings of over USD 100,000.

Awards & Appreciations

- **65 Awards** received for performance, contribution, and delivery excellence.
- **16 formal appreciations** received, reflecting consistent stakeholders and organizational recognition.
- Most recent award received on **21st August 2026**.
